SEO Case Study: Urban Rugs UK

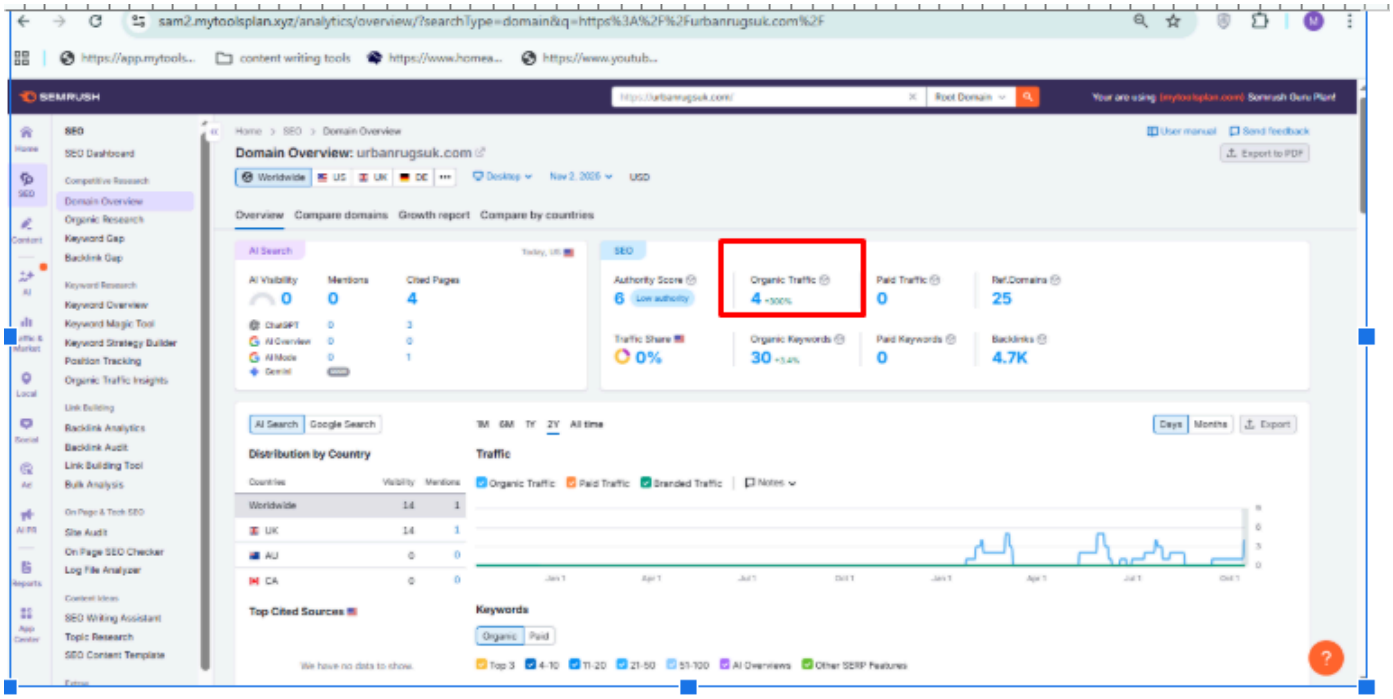
Website: urbanrugsuk.com
Industry: Prayer Mat E-commerce
Target Location: United Kingdom
SEO Duration: 3 Months
Tools Used: SEMrush, Google Search Console, Ahrefs

Project Overview

This SEO project focused on improving the organic search visibility of a UK-based e-commerce website selling prayer mats.

The main goal of the campaign was to increase organic traffic, improve keyword rankings, and strengthen the overall authority of the website in Google search results.

Within three months, the website achieved significant improvements in organic traffic, keyword rankings, and domain authority.



Website Condition Before SEO

Before starting the SEO campaign, the website had very limited search visibility and minimal organic traffic.

According to data from SEMrush:

- **Organic Traffic:** 4/month
- **Authority Score:** 6
- **Organic Keywords:** 30
- **Referring Domains:** 25

Most important keywords were ranking on **page 2 or page 3 of Google**, which significantly limited organic traffic and sales potential.

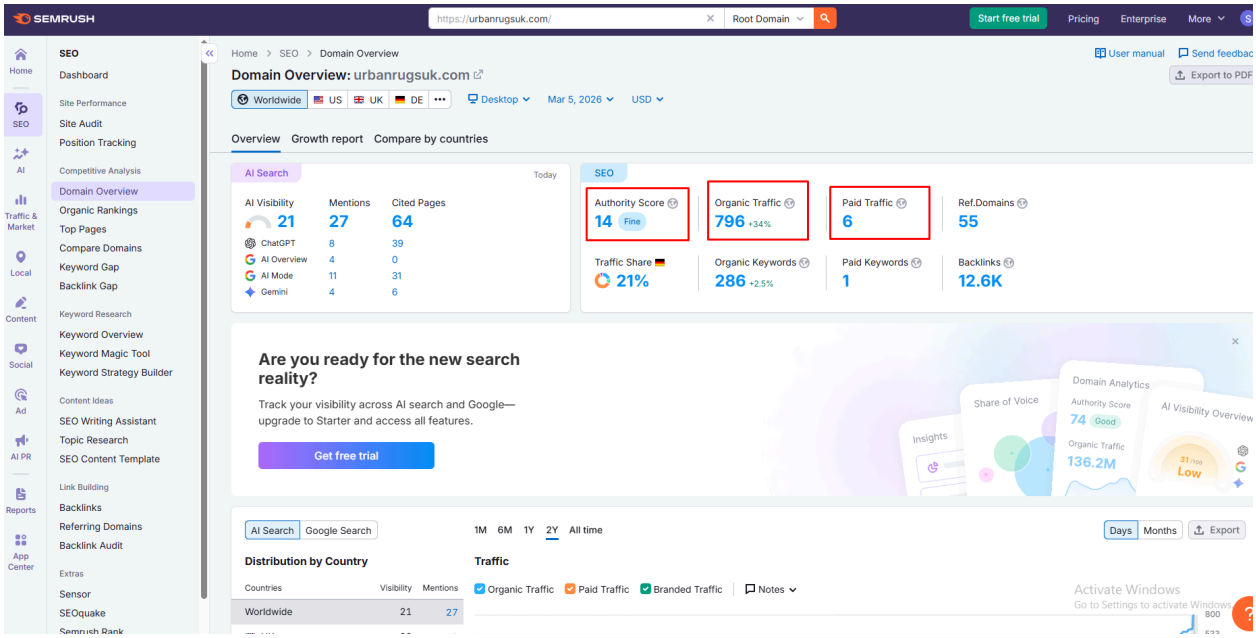
Keyword Rankings Before SEO

Keyword	Search Volume	Previous Position
prayer mat	1K	#18
prayer rug mat	4.4K	#13
padded prayer mat	100	#15
prayer mats for muslims	100	#16
muslim prayer mat	100	#26
padded prayer mats for kids	100	#6
personalised prayer mat UK	50	#12

Because most keywords were ranking outside the top 10, the website was missing a large amount of potential organic traffic.



SEO Strategy Implemented

During the 3-month SEO campaign, the following strategies were implemented:

1. Keyword Research

High-intent keywords related to prayer mats in the UK market were identified and targeted.

2. On-Page SEO Optimization

Key improvements included:

- Optimizing title tags and meta descriptions
- Improving heading structure (H1, H2, H3)
- Keyword optimization for product and category pages
- Improving product page content

3. Technical SEO Improvements

Technical issues affecting search performance were fixed, including:

- Crawlability improvements
- Site structure optimization
- Indexing fixes
- Page speed improvements

4. Content Optimization

Existing pages were optimized with relevant keywords and additional content to improve topical relevance and search visibility.

5. Internal Linking Strategy

Internal linking was improved to help search engines better understand the website structure and distribute authority across important pages.

6. Backlink & Authority Building

High-quality backlinks were acquired to increase domain authority and improve search rankings.

Results After 3 Months

After implementing the SEO strategy, the website experienced strong organic growth.

According to SEMrush data:

- **Organic Traffic:** 4 → **796/month**
- **Authority Score:** 6 → **14**
- **Organic Keywords:** 30 → **286**
- **Referring Domains:** 25 → **55**
- **Backlinks:** 12.6K

This demonstrates significant improvement in organic search visibility within a short period.
